

Happy New Year 2010

Calendar Refill

We are pleased to send you the refill for the Sharon wooden desktop calendar which was sent to you earlier. This is the 7th in our series of the theme calendars and is on "GIANT BUILDINGS". We hope you like them as much as we liked putting them together.

We will be happy to receive your feed back or suggestions on future calendar themes at vk@sharonply.com or you can write us at
M/s Century Plyboards (I) Limited,
No.12 Sriman Srinivasan Road, Alwarpet, Chennai-18.

Plywood Giant presents the World's Giant buildings...

Architecture, like any other form of creativity is not immune to popular trends and styles. Some trends however, endure the test of time and only increase in popularity as the years go by. One such trend is that of Giant Buildings. These massive marvels range from skyscrapers and stadiums, to palaces and places of worship. These structures are true works of art, not just because of their sheer size, but also due to the effort involved in creating them.

In this calendar- the seventh in our series of annual theme desk calendars - Sharon the plywood giant presents GIANT BUILDINGS. We hope that this inspires you to continue dreaming and create your own master piece.

We thank you for your enthusiastic response to our earlier calendars and are as always, keen to have your suggestions and feedback. If you have enjoyed this calendar and would like us to send it to one or more of your friends or colleagues, please send their names, contact addresses and phone numbers to vk@sharonply.com before Jan 31, 2010.

12 Sriman Srinivasan Road, Alwarpet, Chennai-600 018

Menzis office building, Netherlands

With its high, angular structure, the Menzis office is a distinctive landmark in Groningen's. The 12 storey building is divided into three identical prismatic segments, rotated 90° in relation to each other. With dimensions of 43 by 43 metres, the segments are characterised by functional yet aesthetic compactness. Each segment contains four storeys, intersected vertically by an atrium.

Plywood Giant presents the World's Giant buildings...

Rainier Tower, Washington

This 40 storey skyscraper scales a total height of 514 feet (393 feet without the 121 foot base). The skyscraper has an unusual appearance, being built atop a 121-foot (11 storey) concrete base that tapers towards ground level, like an inverted pyramid. It was designed by Minoru Yamasaki, who also was architect of the World Trade Center in New York City.

Plywood Giant presents the World's Giant buildings...

Torre Agbar, Spain

The Torre Agbar, or Agbar Tower, is a 33 storey tower in Barcelona, Spain. It was inspired by Montserrat, a mountain near Barcelona, and by the shape of a geyser rising into the air. Measuring 144.4 m (473.75 ft) in height, it consists of 38 storeys, including four underground levels. A defining feature of the building is its nocturnal illumination made up of 4,500 LED luminous devices that allow generation of luminous images in the façade.
